(T U B)

CHAPTER 1

Description

A detailed service catalog.

2.1 Framework

OTOBO 11.0.x

2.2 Packages

2.3 Third-party software

-

3.1 Core::Acl

3.1.1 ServiceCatalog::CreateTypeServiceRelatedAcls

This option allows you to automatically generate ACLs for different interfaces when creating services. Services will then only be displayed if the ticket type stored in the service has been selected.

3.1.2 ServiceCatalog::CreateTypeServiceRelatedAcls::Options

Acl configuration für Type - Service restrictions. Please activate ServiceCatalog::CreateTypeServiceRelatedAcls before. For the key ConfigChange please use Possible or PossibleAdd. DeployNewACL deploy the changed acl Immediately.

3.2 Core::DynamicFields::ObjectTypeRegistration

3.2.1 DynamicFields::ObjectType###Service

DynamicField object registration.

3.3 Core::Event::Ticket

3.3.1 Ticket::EventModulePost###9700-SetDynamicFieldCriticalityFromService

Event module registration. Currently, the criticality of the service can also be set in the service, but this has no effect. Therefore, this event module has been implemented that automatically updates the DynamicField Criticality in a ticket as soon as a service has been assigned. Please activate the

SysConfig option `SetPriorityFromCriticalityAndImpactMatrix` to set the priority in the next step based on Criticality and Impact.

3.3.2 `Ticket::EventModulePost###9800-SetPriorityFromCriticalityAndImpactMatrix`

Event module registration. Currently, the criticality of the service can also be set in the service, but this has no effect. Therefore, this event module has been implemented that automatically updates the priority regarding Criticality and Impact in a ticket.

3.4 `Frontend::Base::DynamicFieldScreens`

3.4.1 `DynamicFieldScreens###ServiceCatalog`

This configuration defines all possible screens to enable or disable dynamic fields.

3.5 `Frontend::Customer::ModuleRegistration`

3.5.1 `CustomerFrontend::Module###CustomerTileServiceCatalog`

Frontend module registration for the customer interface.

3.6 `Frontend::Customer::ModuleRegistration::Loader`

3.6.1 `Loader::Module::CustomerDashboard###003-CustomerDashboard`

Loader module registration for the customer interface.

3.7 `Frontend::Customer::View::Dashboard::Configuration`

3.7.1 `CustomerDashboard::Configuration::ServiceCatalog`

Additional settings for the service catalog.

3.7.2 `CustomerDashboard::Configuration::ServiceCatalog###SortByTicketType`

Show services with the following ticket type last.

3.7.3 `CustomerDashboard::Configuration::ServiceCatalog###FAQDescriptionField`

The FAQ field that should be used as the description of an FAQ article in the sidebar (e.g. `Field1`, `Field2`, `Field3...`).

3.7.4 CustomerDashboard::Configuration::ServiceCatalog###DynamicField

Dynamic fields shown in the service catalog screen of the customer interface.

3.8 Frontend::Customer::View::Dashboard::Tiles

3.8.1 CustomerDashboard::Tiles###ServiceCatalog-01

Tile registration for the CustomerDashboard. Module is required.

3.8.2 CustomerDashboard::Tiles###FeaturedLink-01

Tile registration for the CustomerDashboard. Module is required.
